About Indian Bananas

Bananas contain about 74% water, 23% carbohydrate, 1% protein, and 0.5% fat. A 4-ounce banana without the peel is a good source of vitamin B6, potassium and fibre.

Ripe fruits can be pulped for puree for use in a variety of products including ice cream, yogurt, cake, bread, nectar, and baby food. Ripe bananas can be dried and eaten, or sliced, canned with syrup, and used in bakery products, fruit salads, and toppings. Green (unripened) bananas can be sliced and fried as chips. Whole green fruits can also be dried and ground into flour. Vinegar and alcoholic beverages can be made from fermented ripe bananas.

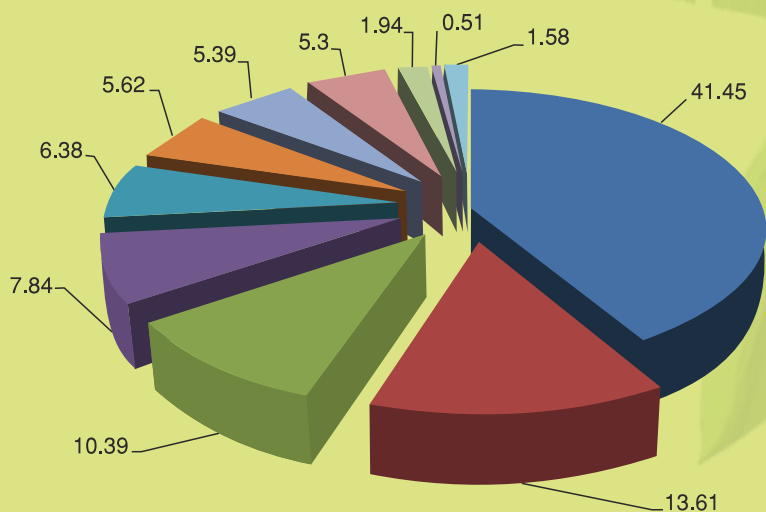

CAVENDISH BANANA

It Occupies majority space in Indian exports.

WHY INDIAN BANANA?

Everyone likes to eat fruit. But, Banana is one of the most eatable fruit in the 50% population in all over the world. Banana is an important fruit crop of many tropical and subtropical regions of India. It is cultivated in India in an area of 830.5 thousand and total production is around 29,779.91 thousand tons. The largest cultivation of banana growing state is **Maharashtra**.
